

Proofreading and Editing of Spanish Texts

A description of this service

This service is at this time provided only on texts written in Spanish.

When asking for a quote, you should specify the extent of proofing required, as per the following specifications:

Flash Proofreading

Your work is the final product: it has already been written, translated, reviewed or corrected, and only requires a swift read to detect any minor errors that might have slipped by.

Standard Proofreading

Includes checking and correcting spelling mistakes, typos, punctuation, capitalization and awkward grammar.

Standard Plus Proofreading

Includes our standard service plus proofing for general structure, consistence, word choice, clarity, redundancies, non-Spanish turns of phrase.

Deep Editing

Involves a more comprehensive edit, or even rewriting of copy if appropriate. Our suggestions shall be highlighted and worked directly into the text. Likewise, we shall insert any comments or questions to you for sections or paragraphs that may require further clarification.
